HAND DELIVERED

Mr. Jimmy D. Givens  
Staff Attorney  
Oklahoma State Department of Health  
1000 N.E. 10th  
Oklahoma City, OK 73127-1299

Re: Ron Grubb;  
Sooner Dial Site; Clinton, OK

Dear Mr. Givens:

Pursuant to our telephone conversation yesterday, enclosed herewith please find a copy of the Proposed Site Characterization and Preliminary Remediation Plan for the above-referenced site. This report has been prepared by Techrad Environmental Services, Inc. Additionally, please find a letter dated February 21, 1992, from Techrad to my office concerning the above-referenced matter. In the letter, you will note that they discuss several conversations with your office (Radiation Protection Division) in putting their Proposed Site Characterization and Preliminary Remediation Plan together. In light of the fact that the estimates for this are quite excessive (in excess of \$600,000.00) I believe we may need to have additional discussions as to the degree of remediation that is actually necessary for the site.

I plan on meeting with my client this week and I do not believe he is in the financial position to bear this burden. However, as I have mentioned previously, I have been in contact with EDO Corporation in New York who was the owner and operator of the site when the contamination took place. I will be forwarding them a copy of the enclosed materials as it is clearly their obligation as the owner/operator and generator of the low level radiation of the site.

I do appreciate your cooperation through this point and ask your further indulgence in connection with the need to bring EDO Corporation into this matter as it is likely their financial condition far exceeds that of my client. Please contact me after you have had an opportunity to review the enclosed materials.

Sincerely,

  
Mark S. Schwartz
